

The drawing shows a side elevation of a window frame. On the left, there are two vertical dimension lines with arrows at both ends. The outer one is labeled with the number 250, and the inner one is labeled with the number 243. The window frame itself consists of a vertical mullion on the left, a vertical mullion on the right, and a horizontal mullion at the top. The top mullion is shown with a slight curve at its ends where it meets the vertical mullions. To the right of the main window frame, there is a smaller, simplified representation of a window frame, also consisting of vertical and horizontal mullions.
